PROFESSIONAL SUMMARY

High-performing, solutions-driven Senior Backend & Enterprise Integration Specialist with over 6 years of demonstrable expertise in engineering resilient, high-throughput microservices, distributed architectures, and mission-critical enterprise middleware across telecom and global digital commerce landscapes. Adept in the .NET ecosystem (C#, ASP.NET Core, .NET 6/10), multithreading, reactive asynchronous pipelines, and polyglot data persistence utilizing MS SQL Server, Oracle PL/SQL, and MongoDB. Proven track record architecting enterprise integration fabrics across 17+ high-profile international clients, orchestrating seamless ETL pipelines and bidirectional data synchronization between tier-1 ERP platforms (Infor SX.e, Epicor Prophet 21, Eclipse, AD/IDEA) and leading PIM/Digital Experience solutions (Akeneo PIM, Quable, Optimizely Commerce Cloud). Demonstrates advanced capabilities in background workflow orchestration via Hangfire, containerized environments (Docker, Linux), and cloud-native serverless paradigms (Azure Functions, Azure Logic Apps, AWS), consistently reducing latency, optimizing memory footprints, and enforcing uncompromising 99.9% SLA availability for enterprise-scale systems.

PROFESSIONAL EXPERIENCE

SENIOR BACKEND & ENTERPRISE INTEGRATION DEVELOPER **October 2021 – Present**
Xngage Nablus, Palestine

- ⇒ Spearheaded the architecture and end-to-end development of an enterprise middleware and orchestration engine built upon Hangfire and MongoDB, facilitating automated, bi-directional synchronization cycles across 17 international enterprise accounts.
- ⇒ Engineered resilient, schema-validated ETL and data-feed pipelines interfacing complex ERP frameworks (Infor SX.e, Epicor Prophet 21, Eclipse, AD & IDEA) with enterprise PIM systems (Akeneo PIM, Quable PIM) and digital commerce suites (Optimizely B2B Commerce Cloud).
- ⇒ Implemented cloud-native microservices via Azure Logic Apps and Azure Functions to orchestrate real-time, event-driven data ingestion from client ERP cores straight into Akeneo PIM.
- ⇒ Extended and refactored core out-of-the-box (OOTB) Optimizely Commerce Cloud capabilities, implementing custom business logic, secure REST APIs, and external SaaS integrations for 10+ prominent enterprise accounts.
- ⇒ Contributed to the design and implementation of distributed back-end services for XBranch, the company's proprietary high-scalability SaaS platform, utilizing ASP.NET Core and MongoDB.
- ⇒ Streamlined heavy database execution plans, eliminated thread starvation, and optimized asynchronous batch operations, delivering zero-data-loss synchronization during peak operational hours.

BACKEND SOFTWARE DEVELOPER **July 2019 – October 2021**
Jawwal (Palestine Cellular Communications Co.) Ramallah, Palestine

- ⇒ Collaborated in engineering high-concurrency microservices fueling the flagship Jawwal Mobile Application (2022 release) and the national E-Topup Engine, serving huge number of concurrent subscribers and thousands of cross-regional merchants.
- ⇒ Designed and deployed robust enterprise service bus (ESB) and middleware layers integrating hundreds of siloed internal telecommunication nodes utilizing ASP.NET Core, Java (Apache CXF), and Apache Camel.
- ⇒ Modernized resource-heavy legacy WSDL/SOAP services into high-performance, multithreaded RESTful Web APIs, securing significant drops in API response latency and memory utilization.
- ⇒ Enforced stringent transactional consistency, robust thread safety (async/await), and distributed caching tiers to absorb high-frequency financial top-up spikes across Oracle PL/SQL and SQL Server clusters.
- ⇒ Implemented strict security standards, rate-limiting rules, OAuth2/JWT authentication schemes, and centralized telemetry across internal and partner-facing endpoints.

ANDROID DEVELOPER **April 2019 – July 2019**
Blue Ramallah, Palestine

- ⇒ Engineered and shipped client-side modules for enterprise mobile utilities, including field sales automation applications such as the Repzo App.
- ⇒ Configured local offline-first persistence with SQLite, dynamic broadcast receivers, background location telemetry, and efficient JSON network serialization over RESTful endpoints.

EDUCATION

BACHELOR'S DEGREE IN COMPUTERIZED INFORMATION SYSTEMS (CIS) **2013 – 2018**
An-Najah National University | **Website**: www.najah.edu Nablus, Palestine

PALESTINIAN GENERAL SECONDARY EDUCATION CERTIFICATE (TAWJIHI) **2012 – 2013**
Al-Malek Talal Secondary School | **Filed**: Scientific Stream Nablsu, Palestine

PROFESSIONAL CERTIFICATIONS

- ⇒ Akeneo Technical Integration Specialist Certification — Akeneo PIM (Certified through May 2026)
  Verification Link: verify.skilljar.com/c/zgdkyosfakir
- ⇒ Optimizely Certified B2B Commerce Cloud Developer — Optimizely
- ⇒ AWS re/Start Graduate — Amazon Web Services Training & Certification
- ⇒ AWS Certified Cloud Practitioner — Amazon Web Services (In Progress / Final Stage)
- ⇒ Full verified certification credentials available on LinkedIn profile.

TECHNICAL & PROFESSIONAL COMPETENCIES

TECHNICAL COMPETENCIES:

- ⇒ **Languages & Core Frameworks:** C#, ASP.NET Core, .NET 6/10, Java, Android SDK, Entity Framework Core, LINQ.
- ⇒ **Architecture & Distributed Systems:** RESTful APIs, Microservices Architecture, Enterprise Application Integration (EAI), SOAP/WSDL, gRPC, Multithreading, Asynchronous Processing, GoF Design Patterns.
- ⇒ **Enterprise Platforms & Integrations:** Akeneo PIM, Quable PIM, Optimizely Commerce Cloud, ERP Systems (Infor SX.e, Prophet 21, Eclipse, AD/IDEA).
- ⇒ **Database Systems & Data Modeling:** Microsoft SQL Server, Oracle (PL/SQL), MongoDB, SQLite, Query Optimization, Database Indexing.
- ⇒ **Cloud & DevOps Ecosystem:** Azure Functions, Azure Logic Apps, AWS Core Services, Docker Containers, Portainer, Linux/Bash Scripting, Hangfire Job Orchestration, CI/CD, Git, Jira.
- ⇒ **Networking & Protocols:** VLANs, TCP/IP, API Gateways, Secure Web Protocols, Service Bus.

PROFESSIONAL ATTRIBUTES:

- ⇒ **Technical Architecture & System Ownership:** Demonstrated history of steering end-to-end integration designs from technical discovery to production rollouts.
- ⇒ **Cross-functional & Remote Leadership:** Seamless delivery across globally distributed engineering teams, external SaaS vendors, and multinational enterprise stakeholders.
- ⇒ **Complex Root Cause Analysis:** Proficient in unraveling concurrency race conditions, data inconsistencies, and production bottlenecks under tight enterprise SLAs.
- ⇒ **Rapid Technology Onboarding:** Agile adaptability to proprietary stacks, enterprise-grade cloud tools, and rigorous technical certification tracks.

LANGUAGES

- **Arabic:** Native Language (C2).
- **English:** Upper Intermediate (B2).

ADDITIONAL INFORMATION

- **Current Residence:** Tubas, Palestine.
- **Mobility & Relocation:** Fully available for immediate relocation and international business travel (GCC / Globally).
- **Driving License:** Valid Commercial & Heavy Vehicle Driving License (Categories C, D).
- **Marital Status:** Married.
- **Nationality:** Palestinian.
